# **Pharmacy Program Specification**

1. Program Identification a	and General Information
Program Title and degree	Bachelor in Pharmacy
Unit responsible to grant degree	Faculty of Medical Sciences
Unit responsible in program implementation	Department of Pharmacy
Program Type	Independent
Department / scientific	<u>.</u>
departments participating in the	Faculty of Medical Sciences
program	
Program Study language	English and Arabic
Beginning of the study year	2016/2017
Program Attendance system	Compulsory Attendance
Program place implementation	University Campus
Program Study system	Semester
Time required to graduate	5 Years (173 Credit Hours)
Admission Qualifications	High School Degree
Admission Appreciation	70% at least
Program Coordinator Name	
last date approval for program specifications	

2. Vision, Mission & Aims of the University
<ul> <li>Vision:</li> </ul>
Getting the leadership and the excellence in the fields of higher
education and scientific research so as to achieve the persistent
development.
<ul> <li>Mission:</li> </ul>
Providing distinguished education of high quality through creating
inspiring environment for education and intellectual creativity, and to
support the scientific research in Yemen so as to fulfill the market needs
nationally and regionally
• Aims:
1) To be outstanding in providing the educational programs that equip
the students with the knowledge and skills needed by the business
market.
2) Supporting and enhancing the scientific research theoretically and
practically in the different fields.
3) To be committed in applying the quality standards and looking for
getting the academic accreditation.
4) Providing the necessary infrastructure to support the educational
process and motivating the students' activities.
5) Improving the relationships with the universities and scientific
research institutions nationally, regionally and internationally.
6) Serving the society through establishing training and consultant
centers.

3. Vision, Mission & Aims of the Faculty
<ul> <li>Vision:</li> </ul>
Leadership and excellence in the field science of pharmacy and medical
laboratories locally, regionally and globally.
<ul> <li>Mission:</li> </ul>
Providing specialized educational programs of high quality in the fields of
pharmacy and medical laboratories to improve healthcare services through
educational programs in accordance with quality standards that can support
national pharmaceutical industries, market needs and serve community
• Aims:
1. To be excellence in the provision of educational programs in the areas of
pharmacy and laboratories that earn the student necessary knowledge and
skills to meet the needs of the labor market
2. Encouraging and supporting scientific research in the fields of pharmacy and laboratories science.
3. Providing educational environment of high quality in accordance with the
modern techniques of education.
4. Serve the community, manage the safe and efficient distribution of
medications through practicing in an ethical, legal manner and according to
the GMP and GPP guidelines.
5. Performing students the pharmaceuticals qualitative and quantitative
analytical techniques according to GLP and GPMP guidelines to assess the
quality and quantity of raw materials from natural or synthetic sources and
different pharmaceutical products.

4. Vision, Mission & Aims of the Department
<ul> <li>Vision:</li> </ul>
Leadership and excellence in the field of teaching pharmacy science locally
and internationally
<ul> <li>Mission:</li> </ul>
To prepare graduates who are competent, professional and ethical i
pharmaceutical science, offering and providing healthcare services i
accordance with quality standards to provide the health-related needs of the
society and be the first department is in Yemen in this field.
• Aims:
<ol> <li>Preparing specialized graduates in the field of pharmaceutical science who are well-qualified at the academic and professional levels, i accordance with international quality assurance standards.</li> </ol>
2) Continue development of the department academic programs an updating them to cope with recent development of society and its needs
<ol> <li>Developing a partnership with the public and private sectors b conducting studies and providing consultancy in information technolog filed.</li> </ol>
4) Provide students with basic concepts and skills of research and develo their initiative and ability to carry out independent research as a basis for further postgraduate study in the field.
5) Training students to think critically, communicate effectively and wor in a team.

# 5. Program References

This program based on a number of similar references and programs in the Yemeni, regional and international universities, which include the following:

#### Academic Standards:

 National Academic Reference Standards for Health Sciences(NARS) which is based on Accreditation Council for Pharmacy Education (ACPE) <u>http://naqaae.eg/wpcontent/uploads/2014/10/NARS-Pharmacy-final-version.pdf</u>

## **Government Guidelines**

- Law No. (13/2005) concerning universities, higher institutes and private colleges and its executive regulations.
- Standards of the Council of Quality and Academic Accreditation.

#	University Name	Faculty	Department	Country	Program Accrediting Body	Univ. Website

# 6. Specification of the graduate student

The graduate of Pharmacy from the University has a distinguished profile of the graduates of the faculties of pharmacy in the other universities. This is based on the university's syllabus for the teaching of the Bachelor of Pharmacy, which is characterized by diversity and flexibility, focusing on practical courses and field training, in addition to extracurricular activities and self-confidence. The specifications of a graduate of the college of pharmacy can be detailed from the university as follows:

- It has a strong and distinctive scientific structure especially in the fields of chemistry and biology.
- Able to conduct experiments, necessary pharmaceutical calculations, prepare some pharmaceutical prescriptions according to the Good Laboratory Practice (GLP).
- Acquire extensive experience in the field of scientific, practical and research, enabling him to work in the pharmaceutical industries and laboratories in Drug Desiyn, discovery and analysis.
- Capable of establishing and managing private pharmaceutical projects.
- Able to provide medical care to patients, including selection of appropriate dose according to the patient's need as well as advise the patient about the use the drug and expected side effects to ensures patient's safety, benefit of treatment and reliable communication with the patient.
- Able to detect errors in prescriptions, as well as communicate and interact with patients and community
- Has an efficient communication and marketing skills to work as a medical advertising representative in pharmaceutical companies or medical warehouses.
- Is able to interact with the patient and diagnose certain diseases and find the necessary treatment according to the constitutions of medicines and the World Health Organization as provided by the ethics of medical professions as mentioned earlier.
- Is able to raise the level of health and develop the pharmaceutical sector in terms of pharmaceutical service and create new jobs serving the health sector in general and pharmacist in particular and strengthen the role of pharmacist in the community and supports the mutual trust between the pharmacist and his countrymen to live up to the profession under the current economic and political pressures on pharmacists in Yemen

- He has sufficient scientific knowledge and practical experience in all fields of pharmacy and subjects to enable him to complete his educational career in any high-level specialization he wants in prestigious international universities.
- Is able to work in the governmental sector in all its fields of hospitals, health centers, medical control and medical inspection, as the requirements of the Ministry of Health for these sensitive jobs is very accurate and under the pressure of strong competition.
- Is able to use paper references and electronic resources in addition to the use of technology to conduct research and draw conclusions related to pharmaceutical, medical and pharmaceutical, all the scope of his work.
- Is able to work in educational institutions, which requires a sufficient amount of medical and pharmaceutical knowledge in addition to the distinguished personality, which in turn enables the graduate of pharmacy, whatever the place where he competes to work to prove himself and achieve what is required in the fields of teaching and scientific research, thus achieving the desired excellence that qualifies him for development and advancement.
- The graduate of Pharmacy department enjoys a strong leadership, perseverance and ability to integrate and produce under the pressure of work and life, ensuring continuity in success, development and self-expression.

# 7. Intended Learning Outcomes:

# At the end of this program student will:

# A- Knowledge and understanding:

- (A1) Demonstrate knowledge of essential pharmaceutical sciences.
- (A2) Know basic principles of biopharmaceutic & pharmacokinetic, its application in therapeutic usage of medicine and bioequivalence studies.
- (A3) Acquire the required knowledge of all basic ,assisting or behavioral sciences.

# **B-** Cognitive skills:

- (B1) Join the knowledge and understanding of principles related to pharmaceutical sciences
- (B2) Apply the pharmaceutical knowledge in designing safe & effective drug and dealing with novel drug delivery system(NDDS) and ability in applying modern scientific methods for analysis.
- (B3) Explain the stages of pharmaceutical industry & apply principles of good manufacturing practice(GMP) and choose the suitable methods of extraction ,manufacturing ,detecting and titration of active ingredient from their different sources.
- (B4) Detect the reasons of medical interaction in prescriptions to minimize medical errors and Classify drugs according to function ,chemical structure and detect their structure activity relationship (SAR) in addition to differentiate drug dosage forms.

# C- Professional and practical skills:

- (C1) Calculate the suitable doses for each age ,sex or medical case & use the medical terms and Choose drugs depending on clear understanding of disease causes and give advice to individuals of community about safe and effective use of drugs (especially OTC drugs ) in addition to practice skills of marketing.
- (C2) Extract , formulate ,manufacture , dispense drugs and perform quality control tests(Q.C) according to GMP .
- (C3) Use efficiently the laboratory instruments and devices required in preparation or analyzing.

• (C4) Perform required tests and bioequivalence studies.

# **D-** General and transferal Skills:

- (D1) Communicate effectively with health care team and practice the marketing skills of medicines.
- (D2) Demonstrate transition from a dependent to an active self-directed learner and take evidence decisions based on regular practice of searching.
- (D3) Use effectively relevant and appropriate technologies to enhance learning and communication.

8. Teaching Strategy It includes description of teaching strategies to achieve learning out comes of the program (lecture, seminar, laboratory, groups, set with description of how to use them and guerrage of each of in every source.								
	s, ect. with description of how to use them and average of each of in every course							
Teaching Strategy Lectures	<b>Description of how it will be used</b> It is the most frequently employed teaching method to convey knowledge and explain theories to students .							
Seminars	These are mainly used with small groups of students discussing and negotiating the different concerns of their studies.							
Lab experiments	Students doing practices in pharmaceutical sciences							
Cooperative learning	Helps the students to work with each other so as to foster their abilities in problem-solving and creativity.							
Field visits and training	Field visits to the pharmaceutical companies, medical laboratories and medical facilities .							
Dialogue and discussion	Allowing the students to ask questions during the lecture							
Training at computer labs	Used mainly in pharmaceutical laboratories, industrial plant and hospitals							
Presentations	Helps the students to be more confident with themselves by showing what knowledge they have acquired							
Self-learning	Self-learning is the process by which learners teach themselves							
Training in Biochemical Labs	Students learn practical labs, and acquire skills in field of study							
9. Assessment Strategy Regulation and rules of setting for exams ( do the program have its own regulations and rules and special conditions or it is according the faculty roles) Describe the way in which assessment is used across the program to achieve its teaching and learning outcomes								
Assessment Strategy	Its description(in which course it will be used and in which rate)							
Midterm tests	Closed – book examinations are used in all levels.							
Final exam	Closed – book examinations are used in all.							
Oral tests	This type of exams is allotted to test the oral proficiency of the students involved in the program.							

Quizzes	This method of evaluation is used in most of the courses given in the program.
Reports' and projects evaluation.	Coursework such as "Research Papers"; reports; presentations used in many courses.
Interviews and evaluating the presentation	Most of the courses in the program will use these tasks to foster the students to work hardly and constantly.
Oral discussion.	These kinds of tasks are to be performed in the class in order to create in the students the sense of cooperation and team work.
Home Work	By Assignment individually or in group

# 10.Intended learning outcomes (ILOs) of the Program:

(A) Alignment Program Intended Learning Outcomes of Knowledge and Understanding to Teaching Strategies and Assessment Strategies:								
Program Intended Teaching strategies Assessment Strategies								
Learning Outcomes								
	Lectures	Midterm tests						
A1, A2,A3	Practical	Final exam						
A1, A2,A3	Discussion	Oral tests						
	Training	Quizzes.						

(B) Alignment Program Intended Learning Outcomes of Intellectual Skills to Teaching Strategies and Assessment Strategies:								
Program IntendedTeaching strategiesAssessment StrategiesLearning Outcomes								
B1 , B2, B3,B4	Theoretical Lectures Practical Lectures Discussion Presentations Brain Storm Problems solving. Training	Midterm tests Final exam Oral exam Quizzes Reports' presentation Oral discussion.						

# (C) Alignment Program Intended Learning Outcomes of Professional and Practical Skills to Teaching Strategies and Assessment Strategies:

#### 11. Curriculum Map

Write sub Learning Outcomes, attached it with the program specification document, it should be used as a base to write the curriculum map. The curriculum map will be designed in a table containing courses of the program. It should also indicate the relationships or contribution of each course in achieving the program main and sub-learning outcomes.

12. Program Study System		
<ul> <li>Time required to complete the progra</li> <li>Number of hours and percentage of t</li> </ul>		ibuted as a whole
Number of hours and percentage of t	otal program nours dist	Ibuted as a whole
Credit hours	No. Of Credit hours	Percentage of total program hours
University Requirements	12	07%
Faculty Requirements	27	16%
Program Requirements	134	77%
Total Program Credit Hours	173	100%

#### **13. Admission Requirements**

Specify the criteria of admission in the program process, such as percentage of secondary school, audition, placement tests, or interview.

- Student must be got Secondary science certificate (at least **70%**).
- Original documents and going throw admission process.
- Pass the assessment and testing of the admission or personal interview committee under the applicable regulations.
- Completing university admission application form
- Payment of the tuition fees specified in the Financial Regulations at the beginning of the academic year.
- The applicant has not been dismissed from any other university due disciplinary reasons.
- No admission allowed in two program at the same time.

#### **14.Attendance requirements**

Clarifying the rules and regulations which specify conditions of progression from level to other in order to proceed to the next year. rules and regulations to drop out or to transfer to another program in the same faculty.

All roles are taken from the Univ. system for student affairs and we notice on the main points:

- Pass all courses with maximum mark percent 100% and minimum mark percent 50%
- For practical courses student most pass the 2 parts theoretical and practical
  - Pass theoretical part with minimum mark percent 35%
  - Pass practical part with minimum mark percent 35%
  - The total mark for the 2 parts not less than 50%
- Student goes from study level to the next with no more than 3 failed courses

#### **15.Graduation Requirements**

Clarifying the rules and regulations which specify conditions of the graduation from the program

- Must pass all courses with total credit hours 159 hours
- Minimal limit of marks to pass in each of the program courses:50 Marks
- Successful Completion of Graduation Project.

# 16. Study Guidance Plan

#### First components of the study plan

The study plan in the Department of pharmacy consists of (**173 credit** hours) distributed as follows in the table

#	Requirement Type	Credit Hours
1	University Requirement	12
2	Faculty Requirement	27
3	Program Requirement	134
Total	of credit hours	173

## Second University Requirement

I- وصف المقرر

: صمم هذا المقرر لتزود الطالب بالمعارف والمهارات والاتجاهات السلوكية اللازمة في مجال الأخلاقيات الإسلامية المهنية والتي تمكنه من التحلي بأخلاقيات الإسلام والصفات التي تميزه عن غيره من الناس في هذا المجال والابتعاد عن المفسدات ومحاوله تعزيز الثوابت وأزاله السلبيات.

الأهداف التعليمية. -

- يكتسب المفاهيم العامة للأخلاقيات الجيدة وأثر ها في حياة الفرد.
  - يعدد مبادئ وتعاليم الإسلام ومصادر ها وأسسها.
  - يحدد الأخلاقيات التي يدعو الإسلام إليها ويتحلى بها.
  - يشرح رأي الإسلام في القضايا المعاصرة ويقدم الحلول لها.
    - يثقف المجتمع حول العادات الضارة التي ظهرت فيه.
      - يلم بالقوانين الطبية واللوائح المنظمة للمهنة.
- يدرك أهمية تجنب الأخطاء في المهنة و عقوبتها وفق القانون والشرع.
  - 8. يتحلى بما يدعو إليه الإسلام من أخلاقيات وسلوك
- يستشعر عظمه الله وشرعه في تنظيم الحياة للإنسان في هذه المعمورة.

III – مخرجات تعلم المقرر بعد الانتهاء من هذا المقرر سيكون الطالب قادرا على أن :

المُمْ*هُوُرِيَّ مَ*لْعَ*مَيْيَ لَكُمُوُرِيَّ مَ*لْعَلَمَ وَالبحث العلمي مجلس الاعتماد وضمان الجودة الجامعة اليمنية كلية العلوم الطبية

مخرجات المعرفة والفهم: a1. يبين مدى تميز الأمة الإسلامية بثقافة عريقة بين الثقافات البشرية في مقوماتها و عناصر ها وخصائصها. a2. يصف موقف الإسلام من قضايا العصر في مجالات العلوم النظرية والتطبيقية المختلفة ويناقشها من المنظور الإسلامي. المهارات الذهنية b1 يفرق بين الثقافة الإسلامية وغير ها من الثقافات و يستنتج مساوئ الثقافات الأخرى.

ا**لمهارات العملية و المهنية** c1. يطبق القوانين الطبية واللوائح المنظمة للمهنة و يتجنب الأخطاء في المهنة و عقوبتها وفق القانون والشرع.

> **المهارات العامة** 11 يطور مهارة النقد الهادف والبناء والحوار والمناقشة مع الأخرين .

#### **1-AIMS OF THE COURSE:**

- **1.** Acquire understanding and knowledge about general characters and economic importance of different microorganisms.
- 2. Recognize the basics on which the different microorganisms are classified into major and minor groups.
- **3.** Gain an idea about plant physiology.

#### **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

- **a1-** Outline the principles of biological classification and binomial nomenclature: demonstrate an understanding of the evolutionary history of life on earth:
- a2- Examine and describe the structure and function of cells and their organelles:
- a3- Demonstrate an understanding of cell reproduction, DNA structure and protein synthesis and basic Mendelian genetics<sup>4</sup> discuss the laws governing energy transformations and the role of enzymes in biological systems<sup>4</sup>

#### **B-Intellectual Skills:**

- **b1-** Distinguish osmosis and diffusion.
- **b2-** Distinguish light and dark reaction in photosynthesis.
- b3- Distinguish aerobic and anaerobic respiration.

#### **C-Practical Skills:**

- c1- Isolate, cultivate and purify microorganism
- c2- Use light microscopic examination in identification of microorganisms.
- c3- Prepare colloidal solution.

#### **D**-General Skills and Attitudes:

**d1.**Work separately or in a team to research and prepare a scientific topic.

**d2**. Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

## **C- COURSE CONTENTS:**

	<b>B- PROFISIONAL INFORMATIO</b>	N					

For students undertaking this course, the aims are to:

- 1. Recognize basic concepts of matter and its classification.
- 2. Express mass relationships in chemical reactions.
- **3.** Acquire properties of gases, liquids, and solids.
- **4.** Gain the concepts of thermos chemistry; quantum theory and electronic behavior; periodic relationship of elements in the periodic table; intermolecular forces; and solutions.

#### **2-INTENDED LEARNING OUTCOMES:**

#### A-Knowledge and Understanding:

- **a1.** Classify matter; distinguish between physical and chemical properties, use the periodic table to classify elements and predict trends in properties;
- **a2.** Define and explain the concepts of atomic mass, average atomic mass, mole, molar mass and perform calculations involving these ,write, explain and apply the gas laws;
- **a3.** Explain the kinetic molecular theory (KMT) of gases and use the KMT to qualitatively explain the gas laws; argue the differences between ideal and non-ideal gas behavior;

#### **B-Intellectual Skills:**

Faculty of Medical Sciences

المحكم لوكري المحكم لي المحكم للمحكم وزارة التعليم العالي والبحث العلمي مجلس الاعتماد وضمان الجودة الجامعة اليمنية كلية العلوم الطبية

## **b1**.Analyze different types of matters.

**b2**.Write different chemical symbols.

**b3**.Categorize common processes as exothermic or endothermic and know the sign conventions.

**b4**.Trace the various atomic theories; analyze the Bohr model and the line spectra.

#### **C-Practical Skills:**

c1. Perform chemical experiments

- c2. Balance and interpret chemical equations and perform stoichiometric calculations.
- c3. Apply significant figures and appropriate units in all measurements and calculations;
- c4. Employ electron configurations and orbital diagrams for multi electron atoms.

## **D**-General Skills and Attitudes:

**d1.** Work separately or in a team to research and prepare a scientific topic.

**d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

- 1. Acquire detailed knowledge and understanding concerning physicochemical properties of drugs and excipients that could affect drug performance and the development of an efficacious dosage form.
- 2. Recognize how to utilize these principles in the design of active drugs and pharmaceutical dosage forms.
- 3. Explain the relationship between the physicochemical principles, pharmaceutical formulations and biological activity of drugs.

#### 2- INTENDED LEARNING OUTCOMES:

#### A-Knowledge and Understanding:

**a1**. Recognize the significance of solubility, distribution phenomena & adsorption phenomena in pharmaceutical systems and in the bioavailability of drugs.

**a2**. Describe adsorption & the contribution of diffusion & solubility processes to drug absorption and how this affecting the action of the drug in particular disease.

**a3**. Explain Micrometrics & the origin and the consequences of the interfacial phenomenon and different modes of drug decomposition & adsorption.

#### **B-Intellectual Skills:**

**b1**. Distinguish different types of matters, analyze pharmaceutical degradation data and relate it to drug stability.

**b**2. Correlate the concepts of interfacial phenomena & micrometrics with the formulation and stability of colloidal preparations.

**b3**. Correlate solubility, permeability ,diffusion , adsorption properties & micromeritics of drug material to its bioavailability that meet the health care professionals.

**b4**. Predict possible complexation related problems in pharmaceutical systems based on chemical structures.

#### **C-Practical Skills:**

**c1.** Perform on laboratory instruments and devices used in preparation and analyzing of pharmaceuticals.

c2. Apply extraction, adsorption, viscosity, crystallization & density processes.

c3. Apply flowability evaluation measurement of surface tension.

c4. Identify drug incompatibility reactions.

#### **D-General Skills and Attitudes:**

**d1.** Work separately or in a team to research and prepare a scientific topic.

**d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

Pharmaceutical Botany is a one semester course aiming

- 1. Recognize methods of cultivation and processing of Medicinal Plants as drying, packing and preservation.
- 2. Acquire knowledge on the botanical and biological properties as well as the uses of certain medicinal plants.
- 3. Interpret use of our natural plant resources to introduce new herbal drugs.

#### **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

- **a1**. Basic Pharmaceutical Botany that is relevant to botany, medicinal plants, different processes for preparing the drug to the market starting from cultivation, collection and drying.
- **a2**. Key constituents and uses of some medicinal plants with advanced biological values.
- **a3**. Recognize and identify some of the common plants they have encountered.

#### **B-Intellectual Skills:**

- **b1.** Retrieve, select and collate appropriate traditional botanical and therapeutic information.
- **b2.** Evaluate primary and secondary evidence and arguments.
- **b3.** Integrate and link information across course components, including plant's constituents from different plants families.
- **b4.** Plan and conduct a research task.

#### **C-Practical Skills:**

- **c1.** Analyse samples in the laboratory using appropriate examinations, bearing in mind safety and ethical limitations.
- c2. Use appropriate basic laboratory equipment safely and efficiently.
- c3. Apply principles and limitation of a range of more advanced practical techniques.

#### **D-General Skills and Attitudes:**

d1. Work separately or in a team to research and prepare a scientific topic.d2. Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

#### **C- COURSE CONTENTS:**

For students undertaking this course, the aims are to:

- 1. Provide the student with basic principles in English language including reading, writing, listening and grammar with some medical terms.
- 2. Acquire skills for reading, extracting and handling the information from some short passages.

وزارة التعليم العالي والبحث العلم مجلس الاعتماد وضمان الجودة الجامعة اليمنية كلية العلوم الطبية

**Faculty of Medical Sciences** 

## **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

- **a1-** Correct the mistakes in grammar in some passages.
- **a2-** Extract the information from some short passages.
- a3- Define some medical terms.

#### **B-Intellectual Skills:**

**b1.** Use correct verbs and grammar in writing.

#### **D-General Skills and Attitudes:**

- d1- Work effectively both in a team, and independently on solving problems.
- **d2-** Use internet and search for information.
- d3- Communicate effectively with his teacher and colleagues.
- d4- Write a scientific assay.

At the end of this course student should be:

- **1.** Acquire knowledge various classes (i.e. experimental, observational, overview and health related) of biomedical literature.
- 2. Aware of the situation when each type of biomedical literature is required
- 3. Understand the purpose of each type of these literature
- 4. Recognize the design of each type and how it differs from the others
- 5. Familiar with some of the characteristics of each type that is required in the evaluation process.

### **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

- **a1-** Explain the differences between experimental, observational Literature and the purpose of the study type
- **a2-** Justify when meta-analysis studies are usually required and conducted (this question is general for all types).
- a3-Identify the prevalence of characteristics of diseases in a population.

#### **B.** Intellectual skills

**b1.** Apply in practice the use of charts that describe the education phenomena.

**b2.** Analyze the electronic information using the computer programs and identify the challenges of a particular specialization that might face .

#### **C-Practical Skills:**

**c1.** Finding ways in evaluation of knowledge and intellectual skill about making the reports statically.

c2.Deal with data & analyze them by different statistical methods.

#### **D**-General Skills and Attitudes:

- **d1.** Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

# Second Year First Semester

	<b>Course specification of Analytical chemistry 1</b>						
A- COURSE IDENTIFICATION AND GENERAL INFORMATION:							
1	Course Title:	Analytical Chemistry 1					
С.Н							
2	Credit hours:	Theoretica 1	Practical	Training	Seminar	Total	
		2	2			3	
3	Study level/ semester at which this course is offered:	Second Year / First Semester					
4	Pre –requisite (if any):	General Chemistry					
5	Co –requisite (if any):						
6	<b>Program</b> (s) in which the course is offered:	Bachelor of Pharmacy					
7	Language of teaching the course:	English					
8	The department in which the course is offered:	pharmacy					
9	Location of teaching the course:	Faculty of medical scientists – AL-Yemenia University				'emenia	
10	Prepared by:						
11	Date of approval:						
<b>B- PROFISIONAL INFORMATION:</b>							
<b>1-AIMS OF THE COURSE:</b> 1- Recognize the benefits and problems of analytical chemistry for society.							

- 2- Define the basic principles of analytical chemistry and analytical techniques used in analytical chemistry
- 3- Explain the Requirements of suitable volumetric analysis and acid-base concepts.
- 4- Demonstrate an understanding of solution chemistry, prepare and performing stoichiometric calculations in all parts of chemistry.

## 2-INTENDED LEARNING OUTCOMES:

## A-Knowledge and Understanding:

- **a1.** Recognize the different types of analytical chemistry techniques.
- **a2.** Identify the importance requirements of suitable volumetric analysis and express the concentrations of solutions.
- **a3.** Explain the neutralization reactions, acid-base, indicators, buffer solutions, precipitation reaction, redox reaction, complexometric titrations and the types of cations and anions.

## **B-Intellectual Skills:**

**b1.** Analyze the different types of samples.

**b2.** Integrate the concepts of analytical chemistry with those of other related fields and interpret certain medical phenomena based on such concepts.

## **C-Practical Skills:**

- c1. Use the balance, equipment in laboratory to identify and measure the concentrations.
- **c2.** Apply rules and guidelines related to safety precautions in the laboratory to perform experiments in a risk-free environment
- **c 3.** Design and apply experiments in the field of analytical sciences.
- **c** 4. Calculate the different types of concentrations of solution.

## **D**-General Skills and Attitudes:

**C- COURSE CONTENTS:** 

- **d1.** Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

# **1-AIMS OF THE COURSE:**

## For students undertaking this course, the aims are to:

- 1. To acquire an appropriate background about and recognize the normal structure and function of the body and of each of its major systems
- 2. To acquire an appropriate background about and understand different stages of the life cycle and how these affect normal structure and function
- 3. To Identify and examine the normal Anatomy of the body and of each of its major organ systems grossly.
- 4. Mention and describe the different types of tissues
- 5. Demonstrate knowledge of the structure and function of the body and its major organ systems and of the molecular and cellular mechanisms

## **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

- **a1.** Describe basic animal structure in terms of tissues and organ systems.
- **a3.** Outline the ways in which animals acquire nutrients and describe the structure and function of organs associated with this process
- **a3.** Describe the functional capabilities of each tissue type and relate them to the structure

#### **B-Intellectual Skills:**

- **b1.** Interpret the normal anatomical structures on radiographs
- **b2.** Interpret some clinical findings in relation to developmental basis
- **b3.** Correlate anatomical facts with the manifestation of various nerve injuries the body.
- **b4.** Distinguish aerobic and anaerobic respiration.

#### **C-Practical Skills:**

- c1. Detect the important features of skeleton
- c2. Present the gross morphology of different body organs
- **c3.** Interpret the arrangement of various body organs and internal structures in their normal places (in cadavers and preserved specimens)
- **c4.** Detect the surface Anatomy of various arteries and nerves and other internal structures.

#### **D-General Skills and Attitudes:**

- **d1.** Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

# **1-AIMS OF THE COURSE:**

- 1. Acquire knowledge about the structure and functions of the immune system.
- 2. Recognize types of immune response.
- 3. Correlate the structure and role of the major histocompatibility complex HLA.
- 4. Illustrate the development of immunological tolerance and autoimmunity .
- 5. Identify types of hypersensitivity reactions .
- 6. Recognize the basis of tumor immunology.
- 7. Discuss immune responses against infectious diseases .

## 2-INTENDED LEARNING OUTCOMES:

## A-Knowledge and Understanding:

**a1**. Recognize all types hypersensitivity reactions and illustrate immune responses against infectious diseases.

- a2. Explain effects of aging on the immune system.
- a3. Acquire the knowledge of immunology of neonatal and childhood period .

## **B-Intellectual Skills:**

- **b1**. Explore development of immunological tolerance and autoimmunity .
- **b2**. Differentiate primary versus secondary immunodeficiencies.
- b3. Investigate structure and role of the major histocompatibility complex HLA.

## **C-Practical Skills:**

# 1-AIMS OF THE COURSE:

At the end of this module, student will be able to:

- **1.** Nomenclature the different organic compounds.
- 2. Acquire a Knowledge of basic organic chemistry regarding synthesis and reactions of the main organic functional groups, organic stereochemistry.
- **3.** Have a good understanding of organic sugar types.
- 4. Draw the molecular structure of organic compounds

## 2-INTENDED LEARNING OUTCOMES:

## **A-Knowledge and Understanding:**

- a1. Explain chemical behavior, chemical reactions and name of any organic compounds
- a2. Recognize the preparation of any organic compounds from different sources.

A3. Acquire the required knowledge of all basics chemistry, reactions and structures of different compounds.

#### **B-Intellectual Skills:**

**b1**. Analyze the different organic compounds according to their functional groups and elements.

**b2**. Carry out simple chemical reactions.

**b3**. Write chemical reaction equation.

**b4**. Identify the products of any reaction

**b5**. Distinguish the functional groups of organic compounds by their physical and chemical properties.

## **C-Practical Skills:**

**c1.** Apply appropriate laboratory techniques in synthesis the organic compounds and analyzing their purity, safety, potency and quality as per GMP.

c2. Identify organic compounds by using chemical reaction tests.

c3. Perform a selection of basic laboratory procedures in general chemistry.

## **D-General Skills and Attitudes:**

d1. Work effectively both in a team, and independently on solving problems.

d2. Communicate effectively with others.

# 2-INTENDED LEARNING OUTCOMES:

A-Knowledge and Understanding:

- **a1-** Recognize the pharmaceutical dosage form design and the quality control of pharmaceutical formulations according to GMP and pharmacopeial requirements to support the pharmaceutical industries and research.
- a2- Distinguish the methods of pharmaceutical calculation
- **a3-** Recognize the proper medical terminology, abbreviations and symbols in health reports and pharmacy practice

## **B-Intellectual Skills:**

- b1. Calculate the proper dose of drugs for adults and pediatrics
- **b2.** Write simple mathematical conversions for weight, volume, temperatures
- **b3.** Design different types of safe and effective pharmaceutical dosage forms and develop novel methods of qualitative and quantitative analytical and biological analysis for pharmaceutical and biopharmaceutical products that support pharmaceutical research.
- **b4.** Interpret the prescriptions, patient and clinical data, Analysis all the encountered pharmaceutical problems and plan the strategies for their solution, to develop the health care.

## **C-Practical Skills:**

- **c1.** Utilize the proper medical terminology, to communicate with other health care professionals
- **c2.** Employ proper calculations for preparation of different pharmaceutical preparations
- **c3.** Extract, isolate, purify, identify and formulate the natural products and assure their rational use
- c4. Conduct research studies and utilize the results in different pharmaceutical fields

## **D**-General Skills and Attitudes:

- **d1.** Communicate effectively with patients and health care professionals
- d2. Work effectively as a part of a team to perform the required tasks.

1-AIMS OF THE COURSE:

To acquire student a detailed knowledge and understanding concerning preparation and controlling of various pharmaceutical dosage forms.

To provide the student with the knowledge about the theoretical principles outlined in the syllabus in relation to preformulation concepts, design and formulation of a different pharmaceutical dosage forms.

Correlate the theoretical knowledge to the formulation of proprietary dosage forms discussed in this syllabus and an understanding of the manufacturing processes involved in the preparation of these dosage forms.

## **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

- a1. Explain the principles of reformulation of pharmaceutical dosage forms.
- **a2.** Describe the characteristics of the liquid dosage forms and explain how these characteristics affect the action of the drug.
- **a3.** Explain the principles of design and formulation, manufacturing of pharmaceutical liquid dosage forms.

#### **B-Intellectual Skills:**

- **b1.** Analyze the instability of pharmaceutical dosage forms when occurred.
- **b2.** Categorize the drug manufacturing relating problems and solve it.
- **b3.** Manipulate the stability study data.

## **C-Practical Skills:**

- c1. Prepare of certain pharmaceutical dosage forms.
- c2. perform quality control for pharmaceutical dosage form.
- c3. Formulate good and stable dosage form like solutions, emulsion and suspension.
- c4. Design and perform stability studies for pharmaceutical dosage forms.

## **D**-General Skills and Attitudes:

- **d1.** Work separately or in a team to research and prepare a scientific topic.
- d2. Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

# **1-AIMS OF THE COURSE:**

- 1. Acquire an appropriate functional background of cells, tissues, organs& systems.
- 2. Integrate physiological data & mechanisms with the ongoing basic sciences: Anatomy, histology& biochemistry and clinical applications.
- 3. Follow the rapidly changing and inflating details about molecular biology & genetics.
- 4. Explore in detail the functions of the autonomic, the neuromuscular, the respiratory and the cardiovascular systems as well as their integration to achieve homeostasis.
- 5. Develop the basic scientific research skills as well as effective communication and team work attitudes.

## **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

- **a1.** Recognize the cellular functions at the organelle and molecular level.
- **a2.** Describe & explain the function of the nerve cell the nerve & muscle fiber grossly & the molecular level.
- **a3.** Explain function of the autonomic nervous system, different component of blood, the respiratory & cardiovascular system both grossly and molecular level.

#### **B-Intellectual Skills:**

- **b1.** Analze the most important physiological laboratory results (blood, respiratory, neuromuscular), to distinguish a physiological from pathological condition.
- **b2.** Comment, on some clinical parameters such as: ABP, ECG, nerve conduction velocity pulmonary functions for a normal individual.
- **b3.** Integrate physiology with other basic and clinical sciences.

## **C-Practical Skills:**

- c1. Detect the most important respiratory function tests.
- c 2. Perform the measurement of the arterial blood pressure.
- c 3. Manipulate a stethoscope for hearing heart & respiratory sounds.
- c 4. Record & read an electrocardiogram.

#### **D**-General Skills and Attitudes:

- d1. Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

# **1-AIMS OF THE COURSE:**

- 4- Recognize the benefits and problems of analytical chemistry II for society.
- 5- Define the basic principles of analytical chemistry II and analytical techniques used in analytical chemistry.
- 6- Explain the suitable requirements of precipitation titrations.
- 7- Demonstrate an understanding of solution chemistry, prepare and performing stoichiometric calculations of Ksp,molar solubility and solubility.
- 8- Define the basic principles of reduction oxidation Equilibria and complex metric titrations invol EDTA.
- 6- Describe the types of gravimetric methods.

# 2-INTENDED LEARNING OUTCOMES:

# A-Knowledge and Understanding:

- **a1.** Recognize the different types of analytical chemistry techniques requirement for suitable volumetric analysis and express the concentrations of solutions.
- **a2.** Explain the neutralization reactions, acid and base, indicators and buffer solutions.
- **a3.** Describe the precipitation reaction, redox reaction, complexometric titrations and the types of cations and anions.

# **B-Intellectual Skills:**

## **b1.** Analyze the different types of samples.

**b2.** Integrate the concepts of analytical chemistry with those of other related fields and interpret certain medical phenomena based on such concepts

## **C-Practical Skills:**

- **c1.** Use the balance, equipment in laboratory to identify and measure the concentrations.
- **c2.** Apply rules and guidelines related to safety precautions in the laboratory to perform experiments in a risk-free environment
- **c3.** Design and apply experiments in the field of analytical sciences.
- **c4.** Calculate the different types of concentrations of solution.

## **D**-General Skills and Attitudes:

COUDSE CONTENTS.

- **d1.** Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

# **1-AIMS OF THE COURSE:**

For students undertaking this course, the aims are to:

1.Describe how the embryology development of different tissues and organs from three germ layers: ectoderm, mesoderm, endoderm.

2. Introduce the types of tissues: epithelial, connective, muscles and nervous.

3. Introduce the structures and functions for each tissues.

- 4. Recognize the locations of each cells.
- 5. Describe the structures of bone and cartilage.

# 2-INTENDED LEARNING OUTCOMES:

# A. KNOWLEDGE AND UNDERSTANDING:

- **a1.** Recognize how the tissues and organs development during the embryology, By using power point presentation using videos and several pictures.
- **a2.** Identify the chemical systems employing both qualitative and quantitative

## approaches.

**a3.** Identify functions of cells and tissues and understand the structures for each tissue, By using power point presentation using videos and several pictures.

# **B. INTELLECTUAL SKILLS**

- **b1.** Correlate between histological structure and function of different organs of all studied systems.
- **b2.** Relate the composition of each tissue type to its specific functions.

وزارة التعليم العالى والبحث مجلس الاعتماد وضمان الجودة الحامعة البمنية كلية العلوم الطبية

b3. Differentiate between normal and abnormal karyotyping.

**b4.** Predict which structures are present in a cell from its function.

## C. PROFESSIONAL AND PRACTICAL SKILLS

- **c1**. List the instruments and techniques used to prepare and study histological specimens. By using power point presentation using videos and several pictures to see the cells and tissues.
- c2. Detect different cellular and intracellular components in electron photomicrographs.
- c3. Interpret the difference between types of cells and tissues in histological slides.

## D. GENERAL AND TRANSFERABLE SKILLS

- **d1.** Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

At the end of this module, student will be able to:

- **1.** Acquire a Knowledge of basic organic chemistry regarding synthesis and reactions of the main organic functional groups, organic stereochemistry.
- 2. Nomenclature the different organic compounds.
- 3. Describe the relationship between structure, physical and chemical properties.
- 4. Illustrate the preparations and reactions mechanism of common functional groups

المحكم لتنظيم العالي والبحث العلمي وزارة التعليم العالي والبحث العلمي مجلس الاعتماد وضمان الجودة الجامعة اليمنية كلية العلوم الطبية

#### **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

a1. Acquire knowledge the origin and the theory of aromaticity in addition to important features of benzene chemistry (electrophilic substitution reactions and directing groups).a2. Identify other benzene derivatives such as: alkyl halides halogen, alcohol, ethers and epoxides, aldehydes, ketones, carboxylic acid and amines.

**a3**. Acquire the required knowledge of all basics chemistry, reactions and structures of different compounds.

#### **B-Intellectual Skills:**

**b1**. Analyze the different organic compounds according to their functional groups and elements.

b2. Carry out simple chemical reactions, write chemical reaction equation.

b3. Identify the products of any reaction

**b4**. Distinguish the functional groups of organic compounds by their physical and chemical properties.

#### **C-Practical Skills:**

**c1**. Apply appropriate laboratory techniques in synthesis the organic compounds and analyzing their purity, safety, potency and quality as per GMP.

c2. Identify organic compounds by using chemical reaction tests.

c3. Perform a selection of basic laboratory procedures in general chemistry.

#### **D-General Skills and Attitudes:**

d1. Work effectively both in a team, and independently on solving problems.

d2. Communicate effectively with others.

	<b>B- PROFISIONAL INFORMATION:</b>					

- 1. To acquire a detailed knowledge and understanding concerning preparation and controlling of various pharmaceutical dosage forms.
- 2. To provide theoretical principles outlined in the syllabus in relation to pre-formulation concepts, design and formulation of a different pharmaceutical dosage forms.
- 3. To correlate the theoretical knowledge to the formulation of proprietary dosage forms discussed in this syllabus and an understanding of the manufacturing processes involved in the preparation of these dosage forms.

# 2-INTENDED LEARNING OUTCOMES:

# A. KNOWLEDGE AND UNDERSTANDING:

- **a1-** Acquire knowledge on the principles of design and formulation of pharmaceutical aerosol dosage forms.
- **a2-** Recognize the principles of design and formulation of pharmaceutical semisolid dosage forms.
- **a3** Explain the manufacturing process involved in the preparation of pharmaceutical ophthalmic dosage forms.

# **B. INTELLECTUAL SKILLS**

b1-Analyze the instability of pharmaceutical dosage forms when occurred.b2-Illustrate the drug manufacturing relating problems and solve it.b3-Manipulate the stability study data.

# C. PROFESSIONAL AND PRACTICAL SKILLS

- c1- Prepare of certain pharmaceutical dosage forms.
- c2- perform quality control for pharmaceutical dosage form.
- c3- Formulate good and stable dosage form like ointments, creams and suppositories.
- c4- Design and perform stability studies for pharmaceutical dosage forms.

# D. GENERAL AND TRANSFERABLE SKILLS

- d1. Work separately or in a team to research and prepare a scientific topic.
- **d2**. Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

	<b>B- PROFISIONAL INFORMATIO</b>	N:					

- 1. Acquire an appropriate functional background of cells, tissues, organs& systems.
- 2. Integrate physiological data & mechanisms with the ongoing basic sciences: Anatomy, histology& biochemistry and clinical applications.
- 3. Follow the rapidly changing and inflating details about molecular biology & genetics.
- 4. Explore in detail the functions of the autonomic, the neuromuscular, the respiratory and the cardiovascular systems as well as their integration to achieve homeostasis.
- 5. Develop the basic scientific research skills as well as effective communication and team work attitudes.

# 2-INTENDED LEARNING OUTCOMES:

# A-KNOWLEDGE and UNDERSTANDING:

- **a1.** Acquire knowledge on the cellular functions at the organelle and molecular level.
- **a2.** Explain the functions of the nerve cell the nerve & muscle fiber grossly & the molecular level.
- **a3.** Illustrate functions of the autonomic nervous system, different component of blood, the respiratory & cardiovascular system both grossly and molecular level.

# **B-INTELLECTUAL SKILLS:**

- **b1**. Analyze the most important physiological laboratory results (blood, respiratory, neuromuscular), to distinguish a physiological from pathological condition.
- **b2.** Comment, on some clinical parameters such as: ABP, ECG, nerve conduction velocity pulmonary functions for a normal individual.
- **b3.** Integrate physiology with other basic and clinical sciences.

# **C-PRACTICAL SKILLS:**

- c1. Detect the most important respiratory function tests.
- c2. Perform the measurement of the arterial blood pressure.
- c3. Manipulate a stethoscope for hearing heart & respiratory sounds.
- **c5.** Present physiological scientific data in a graphical form.

#### **D-GENERAL SKILLS AND ATTITUDES:**

- d1. Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

	B- PROFISIONAL INFORMATION:					

Upon successful completion of this course, the students should be able to

- **1.** Illustrate the morphological and histological structures of different organs of medicinal plants such as seeds, fruits, roots and rhizomes.
- 2. Discuss role of these medicinal plants in the treatment of different disease conditions.
- 3. Identify many medicinal Plants microscopically in both their entire and powdered forms.

#### 2-INTENDED LEARNING OUTCOMES:

#### A-Knowledge and Understanding:

- **a1.** Describe the histological structure of the different medicinal plant parts, seeds, fruits, roots and rhizomes.
- **a2.** Give an account on the biologically active principles in each plant part (seeds, fruits, roots and rhizomes) as well as their biological activity.

#### **B-Intellectual Skills:**

- **b1.** Determine unknown drugs seeds, fruits, roots and rhizomes.. (morphologically and microscopically)
- **b2.** Judge whatever the powdered drug is related to seeds, fruits, roots and rhizomes.

#### **C-Practical Skills:**

- **c1.** Use the microscope to decide a given unknown plant powder is related to seeds, fruits, roots and rhizomes.
- c2. Design and perform experiments for detection of adulteration.

# **D-General Skills and Attitudes:**

- **d1.** Work effectively in team.
- d2. Demonstrate written and oral communication skills.

	<b>B- PROFISIONAL INFORMATIO</b>	N:				

- **1.** To gain an overview of Medical Biochemistry specialty e.g., its philosophy, features and methods.
- **2.** To help students to become familiar with the biochemical knowledge and skills necessary to understand other related subjects.
- **3.** To provide the students with an appropriate exposure to the medical biochemistry discipline this will assist students in understanding biochemical alteration in health and disease.
- **4.** To provide students with good knowledge about structure and function of carbohydrate, lipids and proteins.
- **5.** To provide an explanation of the relationship between the three-dimensional structure of macromolecules and their biological activities.
- 6. Course Specifications 2005-2006
- 7. To enable the students to be oriented with structure and biochemical importance of vitamins as well as the structure, functions and kinetics of enzymes.
- 8. To enable the students to be oriented with concepts of molecular biology and how this field gave us a new perspective and new technology used in the diagnosis, treatment and new drugs design.

#### **2-INTENDED LEARNING OUTCOMES:**

#### A-Knowledge and Understanding:

- **a1.** Define the structure and function of carbohydrates, lipids, proteins, nucleotides and enzymes and their action, kinetics of and their role in the diagnosis of diseases.
- **a2.** Illustrate structure and role of vitamins derivatives as coenzymes needed in the activity of enzymes and Point out diseases produced by vitamins deficiency and their clinical prints on the biochemical and molecular basis.
- **a3.** Describe the biological transport and cell membrane and their biochemical, clinical and laboratory important and describe DNA structure, replication, mutation and repair.

#### **B-Intellectual Skills:**

- **b1.** Interpret symptoms, signs and biochemical laboratory findings of some vitamins deficiency disease.
- **b2.** Interpret some plasma proteins electrophoresis
- b3. Point out the clinical significance and some enzymes reactions and kinetics
- b4. Point-out the application of molecular biology in basic and clinical sciences

#### **C-Practical Skills:**

- c1. Detect laboratory reagents and instruments used in biochemistry laboratory.
- c2. Perform chemical tests to study the properties of lipids and fatty acid.
- **c3.** Estimation of total plasma proteins.
- c4. Detect unknown solutions.

#### **D-General Skills and Attitudes:**

- **d1.** Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

С-	COURSE	<b>CONTENTS:</b>
----	--------	------------------

NO	TOPICS	NO OF HOURS	No of Lectures
1	PHYSICO CHEMICAL PRINCIPLES: Molecular structure of water. Different types of bonds -Solution-OH and pH- acids and Bases- Normal and molar solutions-Buffers and physiological buffers-osmotic pressure and surface tension- Adsorption and elution and dialysis – Diffusion expression of concentration.	2	1
2	<ul> <li>CARBOHYDRATES:</li> <li>Definition, functions and classification: Monosaccharide, disaccharides and polysaccharides</li> </ul>	8	4

	<ul> <li>Monosaccharides: Classification, structures and physical and chemical properties. Sugars exhibit various forms of isomerism.</li> <li>Monosaccharides of physiological importance: glucose, fructose, galactose and mannose.</li> <li>Glycoside formation with each other and with other compounds.</li> <li>Sugar derivatives of importance: sugar acids, sugar alcohols, aminosugars and deoxysugars.</li> <li>Disaccharides: maltose, sucrose, and lactose.</li> <li>Polysaccharides starch, glycogen, cellulose and insulin.</li> <li>Glycosaminoglycans (mucopolysaccharides): Structure, function and classification.</li> <li>Glycoproteins (mucoproteins) proteoglycan.</li> </ul>		
3	LIPIDS:	6	3
	<ul> <li>Lipids of physiological functions: Definition, classification and general function.</li> <li>Fatty acids: Saturated and unsaturated w3 and w6 PUFA, OH fatty acids and methyl fatty acids.</li> <li>Triacylglycerol the main storage form of lipids.</li> <li>Waxes.</li> <li>Phospholipids: phosphatidyl compounds - sphingomylines. Importance and functions.</li> <li>Glycolipids.</li> <li>Sterols: ergosterol and cholesterol, 7- dehydrocholesterol, vitamin D, bile acids and steroid hormones.</li> <li>Eicosanoids: prostanoids, prostaglandins, prostacyclins, thromboxanes, leukotrienes and lipoxins.</li> <li>Polyprenoids: share the same parent cholesterol, ubiquinone and dolichol</li> <li>Isopernoids : fat soluble vitamins and carotenes</li> <li>Lipid peroxidation and antioxidants</li> </ul>		
4	<ul> <li>AMINO ACIDS AND PROTEIN:         <ul> <li>Amino acids: classification according to different parameters: Essentiality, polarity, nutritionally, and structural.</li> <li>Properties: optical activity, amphoteric and general properties, peptide formation (examples — glutathione- insulin etc) - derived compounds.</li> </ul> </li> </ul>	6	3

- 1. After completion of pharmaceutical organic chemistry (II) and it's fundamentals, in particular the organic functional groups, this course will provide a comprehensive and sound understanding of the aromatic compounds and their preparations, reactions and IUPAC nomenclature, in this course the student will study the nitrogen compounds, arylhalid. Phenol and sulphonic acid and their derivatives.
- 2. student will know the organic functional groups and thee preparation and reactions.

المحكمة ريسة العمي وزارة التعليم العالي والبحث العلمي مجلس الاعتماد وضمان الجودة الجامعة اليمنية كلية العلوم الطبية

#### **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

a1. Acquire knowledge the origin and the theory of aromaticity in addition to important features of benzene chemistry (electrophilic substitution reactions and directing groups).a2. Identify other benzene derivatives such as: aryl halides halogen, phenol, nitro compounds diazonium salts, sulfonic acid and their derivatives.

**a3**. Acquire the required knowledge of all basics chemistry, reactions and structures of different compounds.

#### **B-Intellectual Skills:**

**b1**. Analyze the different organic compounds according to their functional groups and elements.

b2. Carry out simple chemical reactions.

**b3**. Write chemical reaction equation.

**b4**. Distinguish the functional groups of organic compounds by their physical and chemical properties.

#### **C-Practical Skills:**

**c1**. Apply appropriate laboratory techniques in synthesis the organic compounds and analyzing their purity, safety, potency and quality as per GMP.

c2. Detect organic compounds by using chemical reaction tests.

c3. Perform a selection of basic laboratory procedures in general chemistry.

#### **D-General Skills and Attitudes:**

d1. Work effectively both in a team, and independently on solving problems.

d2. Communicate effectively with others.

# **C- COURSE CONTENTS:**

NO	TOPICS	NO OF HOURS	No of Lectures
1	Amines: Definition, Classification, Nomenclature, General Methods of Preparation, Physical Properties, Chemical Properties (Basicity and Salt Formation, Alkylation, Conversion into Amides, Reaction with Nitrous Acid, Ring Substitution in Aromatic Amines, Basicity of Amines, Effect of Substituents on the Basicity of Aromatic Amines, Exhaustive Methylation of Amines and Hofmann Elimination, Cope Elimination).	4	2
2	Aryl Halides: Definition, Nomenclature, Methods of preparation, Physical properties, Chemical properties (Formation of Grignard reagents, Nucleophilic Aromatic Substitution, replacement by -OH group, replacement by - NH <sub>2</sub> group), The Mechanism of Nucleophilic Aromatic Substitution, Nucleophilic Substitution of Substituted Aryl Halides, Electrophilic Aromatic Substitution, Other Reactions	4	2

( فر مُوري من العمي العسي المعسي المركم موري التعليم العالي والبحث العلمي مجلس الاعتماد وضمان الجودة الجامعة اليمنية كلية العلوم الطبية

	(Wurtz-Fitting Reaction, Ullman Synthesis), The Influence of Substituents on Reactivity in Nucleophilic Aromatic Substitution (Electron-releasing groups, Electron-withdrawing groups), Influene of substituents on orientation in Nucleophilic Aromatic substitution Comparison of Aliphatic and Aromatic Nucleophilic substitutions		
3	Nitro Compounds: Structure of Nitro Group, The Importance of Nitro Compounds, General Methods of Preparation (Aliphatic and Aromatic), Reactions of Nitro Compounds (Electrophilic and Nucleophilic Substitutions, Reduction under Different Conditions).	4	2
4	<b>Diazonium Salts:</b> Definition, Nomenclature, Methods of Preparation, The Mechanism of Diazotisation, Physical Properties, Chemical Properties (Replaceme -CI, -Br or -CN Sandmeyer's Reaction, Replacement by -I, Replacement by -F, Replacement by -OH, Replacement by -H, Replacement by Aryl Group, Reduction to Hydrazines, Coupling with Tertiary Amines, Reactiions of Primary and Secondary Amines.	6	2
5	<b>Phenols:</b> Definitions, Nomenclature, Preparations of Phenols, Physical Properties and Hydrogen Bonding, Chemical Properties (Acidity and Effect of Substituents on Acidity of Phenols, Ether Formation-Williamson Synthesis, Ester Formation, Halogenation, Nitration, Sulphonation, FriedelAlkylation and Acylation, Koble Reaction, and Reimer-Tiemann Reaction, Phthalein Reaction with Ferric Chloride).	6	3
6	Sulphonic Acids and Their Derivatives:Definition, Nomenclature, Preparations, PhysicalProperties, Chemical Properties (Reactions due to lonisableHydrogen, acidity, salt formation, Formation of FunctionalDerivatives, formation of sulphonyl chlorides, Replacementof Sulphonic Acid Group by -H, by -OH Group, by -NHGroup, Reactions of Aromatic Nucleus, Derivatives ofSulphonic Acid (Chloramine T, Halazone, Saccharin,Sulphanilamide)	4	2

- 1. To acquire a detailed knowledge and understanding concerning preparation and controlling of various pharmaceutical dosage forms.
- 2. To provide theoretical principles outlined in the syllabus in relation to pre-formulation concepts, design and formulation of a different pharmaceutical dosage forms.
- 3. To correlate the theoretical knowledge to the formulation of proprietary dosage forms discussed in this syllabus and an understanding of the manufacturing processes involved in the preparation of these dosage forms.

## **2-INTENDED LEARNING OUTCOMES:**

## A-Knowledge and Understanding:

- **a1.** Explain the principles of formulation of pharmaceutical solid dosage forms and their characteristics of the solid dosage forms and explain how these characteristics affect the action of the drug.
- **a2.** Understanding the principles of design and formulation of pharmaceutical solid dosage forms.
- **a3.** Know and understand various methods for evaluation of pharmaceutical solid dosage forms.

#### **B-Intellectual Skills:**

- **b1.** Recognize the problems encountered during formulation of pharmaceutical dosage forms when occurred.
- **b2.** Identify the drug manufacturing relating problems and solve it.

#### **C-Practical Skills:**

- **c1.** Preparation of certain pharmaceutical dosage forms.
- c2. perform quality control for pharmaceutical dosage form.
- **c3.** Ability to formulate good and stable dosage form like tablet, capsule and sustained releases dosage forms.

#### **D-General Skills and Attitudes:**

- **d1.** Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

- 1. To provide students with an in-depth understanding in principles of drug delivery systems.
- 2. To acquire knowledge on the principles, strategies, materials used & fabrication of such drug delivery systems.
- 3. 3- Illustrate novel pharmaceutical formulations used in drug delivery systems e.g implantable ,transdermal ,Liposomes etc...

## **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

- **a1-** To Recognize the fundamentals and principles of drug delivery and the applications of these fundamentals to building of controlled drug delivery systems.
- **a2-** To acquire knowledge on the principles, strategies, and materials used in the engineering of drug delivery systems, the various technologies and strategies used in drug delivery
- **a3-** To Explain different materials and approaches used in the design and fabrication of such delivery system

#### **B-Intellectual Skills:**

- **b1**-Differentiate between approaches used in the design and fabrication of such delivery System.
- b2- Analyze various technologies and strategies used in drug delivery.

#### **C-Practical Skills:**

**c1**- Use different techniques needed for development, formulation, and evaluation of delivery system.

**c2**- Plan experimental and selecting appropriate techniques demonstrate safe & skillful practical techniques to test the controlled release of materials in an active state.

**c3**- Identify feasible delivery strategies for these environments based on a predefined set of criteria.

#### **D-General Skills and Attitudes:**

C COUDSE CONTENTS.

d1-Work separately or in a team to research and prepare a scientific topic.

**d2**-Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

- 1. To give the students insight into appreciating how understanding of metabolic processes occurring in the human body, could contribute to the
- **2.** To make students familiar with the various control and integrating mechanisms of diverse biochemical events in different metabolic processes, and to understand normal and abnormal human metabolism.
- **3.** To provide knowledge of basic chemical constituents of biological fluids in health and disease, with the ability to determine the relevant investigations for their applications in clinical diagnosis.
- **4.** To enable the student to illustrate and/or describe the metabolic pathways of purines and pyrimidines bases.
- 5. To enable the student to point out the bioenergetics of the concerned metabolic pathways under different physiological circumstances.
- 6. To acquire students experience in biochemical methodology in order to be aware with the clinical biochemistry techniques as diagnostic tools and to be

## 2-INTENDED LEARNING OUTCOMES:

## A-Knowledge and Understanding:

- **a1-** Define the metabolic pathways of carbohydrates, lipids, proteins, nucleotides and their micro-molecules and determine the site of each.
- **a2-** Point out the related metabolic disorders and their clinical prints on biochemical and molecular basis, the role of antioxidants in prevention and treatment of chronic diseases.
- **a3-** Classify the functions of hormones and minerals, their biochemical, clinical and laboratory importance and deficiency manifestations of each.

#### **B-Intellectual Skills:**

- **b1-** Investigate symptoms, signs and biochemical laboratory findings of some metabolic disorders.
- **b2-** Interpret urine report outcome.
- **b3-** Point out the clinical significance of determination of plasma levels of glucose, total proteins, albumin, cholesterol, creatinine and uric acid.
- **b4-** Point-out the etiology of metabolic disturbance in a given case study report.

#### **C-Practical Skills:**

- **c1-** Identify the physical and chemical characters of normal urine under different physiological conditions.
- c2- Perform chemical tests to detect abnormal constituents of urine.
- **c3-** Estimate serum levels of glucose, total proteins, albumin, cholesterol, creatinine and uric acid by colorimetric methods.
- c4- Assess glucose tolerance by glucose tolerance test.

## **D**-General Skills and Attitudes:

- **d3-** Work effectively in team.
- d4- Demonstrate written and oral communication skills.

11	Date of approval:					
	<b>B- PROFISIONAL INFORMATIO</b>	N:				

1.Use different chemical information for modeling and analyzing given problems in design of new pharmaceutical compounds as new drugs.

2. Describe the physical and chemical properties of organic compounds.

3.Acquire knowledge about the application of IR ,NMR and UV spectroscopy in identification of organic compounds

4. Explain the synthesis and reactions of polynuclear hydrocarbons and heterocyclic compounds.

5. Recognize current concepts and basic knowledge of polynuclear hydrocarbons and heterocyclic organic compounds.

6. Provide students with basic knowledge of spectroscopy application of identification of organic compounds.

7. Ability of writing chemical reaction mechanisms and identify unknown organic compounds.

## **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

**a1**. Recognize the nomenclature and chemistry of heterocyclic compounds and the different methods of preparation and reactions of them.

**a2**. Acquire the required knowledge of chemistry, reactions and structures of polynuclear compounds.

#### **B-Intellectual Skills:**

**b1**. Analyze the different organic compounds according to their functional groups and elements.

b2. Carry out simple chemical reactions, write chemical reaction equation.

**b3**. Differentiate between the products of any reaction.

**b4**. Distinguish the functional groups of organic compounds by their physical and chemical properties.

## **C-Practical Skills:**

**c1**. Apply appropriate laboratory techniques in synthesis the organic compounds and analyzing their purity, safety, potency and quality as per GMP.

c2. Identify organic compounds by using chemical reaction tests.

c3. Perform a selection of basic laboratory procedures in general chemistry.

#### **D-General Skills and Attitudes:**

**d1**. Work effectively in team.

d2. Demonstrate written and oral communication skills.

## **C- COURSE CONTENTS:**

Upon successful completion of this course, the students should be able to

- 1. Illustrate the morphological and histological structures of different organs of Medicinal plants such as seeds, fruits, roots and rhizomes.
- **2.** Discuss role of these medicinal plants in the treatment of different disease conditions.
- **3.** Identify many medicinal plants microscopically in both their entire and powdered forms.

#### **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

- **a1-** Describe the histological structure of the different medicinal plant parts viz. herbs and unorganized drugs.
- **a2-** Give an account on the biologically active principles in each plant part viz. (herbs and unorganized drugs) as well as their biological activity.
- **a3-** Design a regime for optimum nutrition (minerals and vitamins).

#### **B-Intellectual Skills:**

- **b1-** Determine unknown drugs viz. herbs and unorganized drugs. (morphologically, microscopically and chemically).
- **b2-** Judge whatever the powdered drug is related to herbs and identify unorganized drugs through chemical tests.

## **C-Practical Skills:**

- **c1-** Use the microscope to decide a given unknown plant powder is related to herbs and unorganized drugs.
- c2- Design and perform experiments for detection of adulteration.
- c3- Perform some experiments to know the nature of unorganized.

#### **D**-General Skills and Attitudes:

**d1-**Work effectively in team.

d2- Demonstrate written and oral communication skills.

A- COURSE IDENTIFICATION AND GENERAL INFORMATION:								
1	Course Title:	Pharmacology 1						
	Credit hours:		Total					
2		Theoretical	Practical	Training	Seminar	Total		
		2				2		
3	Study level/ semester at which this course is offered:	Third Year / Second Semester						
4	Pre –requisite (if any):	Physiology 1 & 2						
5	Co –requisite (if any):							
6	Program (s) in which the course is offered:	Bachelor of Pharmacy						
7	Language of teaching the course:	English						
8	The department in which the course is offered:	pharmacy						
9	Location of teaching the course:	Faculty of University	medical	scientists	– AL-	Yemenia		
10	Prepared by:							
11	Date of approval:							
	B- PROFISIONAL INFORMATION:							

- **1.** Acquire a knowledge about the pharmacokinetic of drugs (absorption, distribution, metabolism and excretion).
- 2. Provide pharmacodynamics of drugs (mechanism of drug action & their biological effects on different body organs and drug-protein binding) and dosage form of drugs (advantages & disadvantages).
- **3.** Recognize uses & adverse drug reactions & their side effects (drug toxicity, abuse, and their misuse).
- 4. Explain the types of drug-drug interactions.

#### **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

- **a1-** Define the drugs affecting G.I.T & R.S., identify mechanism of action, side effects and indication of the drugs.
- **a2-** Illustrate the reasons for various indication of the drugs.
- a3- Recognize various drugs used in hospitals, polyclinic and pharmacy sections.

#### **B-Intellectual Skills:**

- **b1-** Read the dive prescribed drugs.
- **b2-** list precaution to be taken for each drug.
- **b3-** Analyze how to deal with patient when side effect occurred.

#### **C-Practical Skills:**

- c1- Detect the side effect and adverse effect.
- c2- Apply the abbreviations used in pharmacology.

#### **D-General Skills and Attitudes:**

**d3-** Work effectively in team.

**d4-** Demonstrate written and oral communication skills.

Course specification of Biopharmaceutics & Pharmacokinetic 1								
A- COURSE IDENTIFICATION AND GENERAL INFORMATION:								
1	Course Title:	<b>Biopharmaceutics &amp; Pharmacokinetic 1</b>						
	Credit hours:		Total					
2		Theoretical	Practical	Training	Seminar	Ittal		
		2	2			3		
3	Study level/ semester at which this course is offered:	Fourth Year / First Semester						
4	Pre –requisite (if any):	Pharmaceutics 1 - 4						
5	Co –requisite (if any):							
6	<b>Program</b> (s) in which the course is offered:	Bachelor of Pharmacy						
7	Language of teaching the course:	English						
8	The department in which the course is offered:	Pharmacy						
9	Location of teaching the course:	Faculty of University	medical	scientists	– AL-	Yemenia		
10	Prepared by:							
11	Date of approval:							
	B- PROFISIONAL INFORMATION							

To provide a conceptual and quantitative background in pharmacokinetic theory and applications needed to pursue advanced studies in clinical pharmacokinetics and biopharmaceutics as applied to drug delivery system design and pharmacokinetic theory.

## 2-INTENDED LEARNING OUTCOMES:

## **A-Knowledge and Understanding:**

- **a1.** Understanding the effects of various physicochemical, biochemical, physiological and pathological processes on the kinetics and extent of drug absorption, distribution, and elimination.
- **a2.** Explain the effects of dosage form design and routes of drug administration on therapeutic drug levels optimization.
- **a3.** Characterize the impact of efflux proteins at various anatomical sites (i.e., intestinal, placental, and blood-brain barrier), first-pass effect, on the concentration and pharmacologic effect achieved,

## **B-Intellectual Skills:**

**b1.** Design of bioavailability and bioequivalence studies.

**b2.** Analyze empirical pharmacokinetic models to devise and optimize dosage regimens. **b3**. Classify pharmacokinetic models.

#### **C-Practical Skills:**

- **c1.** Adjust and optimize the dose and dosage regimen.
- **c2.** Estimate of drug half life

#### **D-General Skills and Attitudes:**

- d1. Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

# **1-AIMS OF THE COURSE:**

- 1- To provide the student with knowledge, skills and attitudes in the field of environmental health & Nutrition.
- 2- Also to help the student to acquire knowledge, skills and attitudes in the field of health education and Family planning, enable him/her to participate efficiently in solving some of health problems affecting the community.
- 3- understand the constituents of the food for the daily requirements of the body in health and illness and their sources, functions and deficiencies.
- 4- participate effectively in the health education process & Family planning .

#### **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

- **a1**. Recognize health problems available in the environment that affect the community.
- **a2**. Explain the necessary steps for solving some of health problem affecting the environment and the community.
- **a3**.Illustrate the constituents of food, their sources, functions, deficiencies and daily. requirements in health and illness.

#### **B-Intellectual Skills:**

- **b1.** Prepare simple Materials for the purpose of health education .
- **b2**. Classify constituents of the food for the daily requirements of the body in health and illness and their sources, functions and deficiencies..

#### **C-Practical Skills:**

c1. Accepts Attitude on health team working.

**c2-** Participate in health education activities in his field.

#### **D-General Skills and Attitudes:**

d1. Work separately or in a team to research and prepare a scientific topic.

**d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

# **1-AIMS OF THE COURSE:**

- 1. To provide the knowledge of chemistry of drugs with special references to their pharmaceutical and medicinal usage.
- 2. To acquire the knowledge about the relationship of chemical structure and therapeutic properties.
- 3. To correlate medical chemistry facts with manufacture drugs & clinical application.

# 2-INTENDED LEARNING OUTCOMES:

# A-Knowledge and Understanding:

- a1. Acquire knowledge on the principles of medicinal chemistry.
- **a2.** Describe the basic principles of mechanism action for active groups in pharmaceutics chemistry.
- **a3.** Recognize different reaction between active groups in pharmaceutical chemistry especially in preparations of drugs.

# **B-Intellectual Skills:**

**b1.** Apply preparation (synthesis) of medical compound drugs

**b2.** Identify the different of medical compound drugs by assay& titration

Faculty of Medical Sciences

b3. Determine medically used & roles of important medical compound drugs.

## **C-Practical Skills:**

- c1. Maintain the name of chemical compound & derivatives or chemical modification effects.
- **c2.** Estimate drug half life.
- **c3.** Classify medical compound drugs according to medically used & active group

## **D**-General Skills and Attitudes:

**d1.** Work separately or in a team to research and prepare a scientific topic.

**d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

# **1-AIMS OF THE COURSE:**

1-It provides the basic knowledge about etiology, pathogenesis & pathological changes. 2-Illustrate effects and possible complication of common disease entities along with abnormal changes .

# 2-INTENDED LEARNING OUTCOMES:

## A-Knowledge and Understanding:

- a1. Acquire knowledge on the scope and importance of pathology in clinical practice.
- **a2.** Recognize clinical manifestations of a certain disease and its underlying pathological changes.

## **B-Intellectual Skills:**

- **b1.** Analyze importance and the sources of marine drugs, their toxicities and their promising medicinal applications
- **b2.** Differentiate between clinical manifestations of a certain disease

# **C-Practical Skills:**

- C1. Detect abnormalities that may indicate cancer or other diseases of tissue.
- **C2.** Interpret microscopical changes occurring in the tissues and organs in the studied diseases.

	<b>B-PROFISIONAL INFORMATION</b>						

# **1-AIMS OF THE COURSE:**

- **1.** Acquire a knowledge about the pharmacokinetic of drugs (absorption, distribution, metabolism and excretion).
- 2. Recognize Pharmacodynamic of drugs (mechanism of drug action & their biological effects on different body organs and drug-protein binding) and dosage form of drugs (advantages & disadvantages).
- **3.** Explain uses &Adverse drug reactions & their side effects (drug toxicity, abuse, and their misuse).
- 4. Classify the types of drug-drug interactions.

المحكم وكريت التيميية وزارة التعليم العالي والبحث العلمي مجلس الاعتماد وضمان الجودة الجامعة اليمنية كلية العلوم الطبية

## **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

- a1- Define the drugs affecting cardiovascular and respiratory system
- **a2-** Identify mechanism action and indication, side effects, of the drugs.
- a3- Identify various drugs used in hospitals, polyclinic and pharmacy sections. .

#### **B-Intellectual Skills:**

- **b1-** Read the dive prescribed drugs.
- **b2-** list precaution to be taken for each drug.
- b3 -Explain how to deal with patient when side effect occurred

## **C-Practical Skills:**

**c1.** Accepts Attitude on health team working.

c2- Participate in health education activities in his field.

## **D**-General Skills and Attitudes:

d1. Work separately or in a team to research and prepare a scientific topic.d2. Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

## **C-COURSE CONTENTS:**

# **1-AIMS OF THE COURSE:**

1- Provide the basic phytochemical knowledge.

- 2- Recognize the natural source, classification, extraction, detection, isolation,
- pharmacological and toxicological effects.
- 3- Illustrate chemistry of natural pesticides as well as drugs of marine origin.
- 4- Discuss the major pharmaceutically important secondary metabolites from natural sources (alkaloids & steroids) of pharmaceutical interest.

## 2-INTENDED LEARNING OUTCOMES:

## **A-Knowledge and Understanding:**

- **a1.** Acquire knowledge on the scope and importance of Phytochemistry in drug discovery and modern medicine.
- **a2.** Recognize the chemical structure, medicinal value, natural source, detection, isolation, characterization and medicinal applications of alkaloids & steroids and their importance in orthodox medicine.
- **a3.** Identify the medicinally important alkaloids, their chemical structure, natural sources, detection, isolation and characterization and medicinal applications.

#### **B-Intellectual Skills:**

- **b1.** Analyze importance and the sources of marine drugs, their toxicities and their promising medicinal applications
- b2. Differentiate between different types of alkaloids & steroids..

#### **C-Practical Skills:**

- **c1.** Identify the nature, source, production, and medicinal uses of naturally occurring antibiotics.
- **c2.** Apply chromatography in identification ,differentiation and isolation of alkaloids & steroids .

#### **D**-General Skills and Attitudes:

- **d1.** Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

# **1-AIMS OF THE COURSE:**

- 1. Acquire the basic principles of toxicology and the different disciplines of toxicology.
- 2. Gain knowledge regarding the supportive measures, therapeutic interventions, specific antidotes as general guidelines of treatment modalities.
- 3. Understand the mechanism of toxicity, toxicokinetics, clinical presentation, diagnosis and medications indicated and contraindicated in the treatment of toxicity of common drug and chemical groups.
- 4. Illustrate the serious consequences of exposure to therapeutic drugs and environmental and occupational chemicals.
- 5. Explain the special considerations with maternal, fetal, and neonatal health.

## **2-INTENDED LEARNING OUTCOMES:**

## **A-Knowledge and Understanding:**

- **a1.** Acquire knowledge on Knowledge about the various means of possible exposure to therapeutic and non-therapeutic agents.
- **a2**.Gain an overview of protocols for managing various toxic ingestions, and the antidotes and treatments associated with their pathology
- **a3**. Illustrate knowledge regarding the special considerations with maternal, fetal, and neonatal health.

#### **B-Intellectual Skills:**

- **b1.** Develop a greater awareness for the consequences of ingesting prescription medicines and other compounds with the risk of environmental and biological threats to public safety
- **b2.** Differentiate between exposure to therapeutic drugs and environmental and occupational chemicals.

#### **C-Practical Skills:**

- c1. Identify the serious consequences of toxic drugs and chemicals exposure
- **c2.** Apply supportive measures, therapeutic interventions, specific antidotes as general guidelines of treatment modalities.

## **D**-General Skills and Attitudes:

- **d1.** Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

10	Prepared by:					
11	Date of approval:					
	<b>B-PROFISIONAL INFORMATION</b>					

# **1-AIMS OF THE COURSE:**

1- Provide a conceptual and quantitative background in pharmacokinetic theory

2- Explain different pharmacokinetic models.

3- Acquire knowledge on order of drug degradation reaction and its application in half life & volume of drug distribution in the body.

2-INTENDED LEARNING OUTCOMES:

#### **A-Knowledge and Understanding: a1-** Describe the use of pharmacokinetics in relation to the appropriate administration of drugs, particularly intravenous infusion and multiple dose administration. a2-Understand the theoretical and practical issues of assessment of drug bioavailability and bioequivalence. a3-Illustrate pharmacokinetic parameters used in clinical pharmacokinetics and biopharmaceutics using plasma and urine drug level data. **B-Intellectual Skills: b1-**Design of bioavailability and bioequivalence studies. **b2.** Analyze empirical pharmacokinetic models to devise and optimize dosage regimens. **b3.** Classify pharmacokinetic models. **C-Practical Skills: c1.** Adjust and optimize the dose and dosage regimen. **c2.** Estimate of drug half life c3. Identify order of each degradation reaction. **D-General Skills and Attitudes:** d1. Work separately or in a team to research and prepare a scientific topic. **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day. **C-COURSE CONTENTS:** NO TOPICS NO OF No of HOURS Lectures Terminology and definitions 1 2 Rates and orders 1 Kinetic of drug absorption 2 **Compartment models** Definition • **Basis of Classification** Model selection criteria 5 10 One compartment open model with first order elimination kinetics Pharmacokinetics of single dose as oral and • intravenous (rapid/bolus). Intravenous infusion

1- Provide the knowledge of chemistry of drugs with special references to their pharmaceutical and medicinal usage.

2- Acquire the knowledge about the relationship of chemical structure and therapeutic properties.

3- Correlate medical chemistry facts with manufacture drugs & clinical application.

# 2-INTENDED LEARNING OUTCOMES:

## A- KNOWLEDGE & UNDERSTANDING:

**a1**- Describe the basic principles of mechanism action for active groups in medicinal chemistry

**a2**-Recognize different reaction between active groups in pharmaceutical chemistry especially in preparations of drugs

**a3** -Explain of nomenclature chemically of medical chemistry.

## **B- INTELLECTUAL SKILLS**

**b1**- Apply preparation (synthesis) of medical compound drugs

**b2**- Identify the different of medical compound drugs by assay& titration

**b3**- Determine medically used & roles of important medical compound drugs.

## **1-AIMS OF THE COURSE:**

- 1. Provide knowledge on the classification of parasites.
- 2. Illustrate the morphology and life cycle of parasites.
- 3. Explain the treatment, prevention and control of parasites.
- 4. Express the modes of parasitic infections and the role of vectors in disease transmission.
- 5. Differentiate between various stages of each parasite.

# 2-INTENDED LEARNING OUTCOMES:

## **A-Knowledge and Understanding:**

**a1-** Acquire basic information on morphology and life cycle, various stages of parasites.

a2-Classify different parasites and discuss modes of parasitic infections.a3-Identify methods of parasites transmission ,prevention & control.

## **B-Intellectual Skills:**

b1- Differentiate between parasites.B2- Diagram parasites at various stages.

## **C-Practical Skills:**

## **2-INTENDED LEARNING OUTCOMES:**

#### **A-Knowledge and Understanding:**

**a1-** Define the drugs affecting G.I.T & R.S , and their mechanism of action , side effects

- **a2-** Explain the reasons for various indication of the drugs.
- a3- Identify various drugs used in hospitals and pharmacy sections.

#### **B-Intellectual Skills:**

- **b1-** Read the dive prescribed drugs.
- **b2-** list precaution to be taken for each drug.
- **b3** -Explain how to deal with patient when side effect occurred.

#### **C-Practical Skills:**

- c1-Differentiate between the side effect and adverse effect.
- c2- Identify the abbreviations used in pharmacology.

#### **D-General Skills and Attitudes:**

- **d1.** Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

# **1-AIMS OF THE COURSE:**

1-Provide the basic phytochemical knowledge.

2- Recognize the natural source, classification, extraction, detection, isolation, pharmacological and toxicological effects.

- 3- Illustrate chemistry of natural pesticides as well as drugs of marine origin.
- 4- Discuss the major pharmaceutically important secondary metabolites from natural sources ( phenolics, terpinoids & glycosides ) of pharmaceutical interest.

# 2-INTENDED LEARNING OUTCOMES:

#### **A-Knowledge and Understanding:**

- al.Acquire knowledge on the scope and importance of Phytochemistry in drug discovery and modern medicine.
- **a2.** Recognize the chemical structure, medicinal value, natural source, detection, isolation, characterization and medicinal applications of phenolicsterpinoids, glycosides and their importance in orthodox medicine..
- a3. Identify the medicinally important phenolics, steroids, terpinoids, glycosides
   their chemical structure, natural sources, detection, isolation and characterization
   and medicinal applications

## **B-Intellectual Skills:**

- **b1.** Analyze importance and the sources of marine drugs, their toxicities and their promising medicinal applications
- **b2.** Differentiate between different types of phenolics, steroids, terpinoids, glycosides.

## **C-Practical Skills:**

- **c1.** Interpret the nature, source, production, and medicinal uses of naturally occurring antibiotics.
- **c2.** Apply chromatography in identification ,differentiation and isolation of phenolics, terpinoids, glycosides

# **D-General Skills and Attitudes:**

- d1. Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

## **1-AIMS OF THE COURSE:**

- 1- provide the student with knowledge, skills and attitudes in the field of environmental health & Nutrition.
- 2- Acquire knowledge, skills and attitudes in the field of health education and Family planning, enable him/her to participate efficiently in solving some of health problems affecting the community.
- 3- Understand the constituents of the food for the daily requirements of the body in health and illness and their sources, functions and deficiencies.
- 4- participate effectively in the health education process & Family planning .

# 2-INTENDED LEARNING OUTCOMES:

#### A-Knowledge and Understanding:

- **a1**. Identify health problems available in the environment that affect the community.
- **a2**. Undertake the necessary steps for solving some of health problem affecting the environment and the community.

**a3**. Understand knowledge in proper nutrition, recognize the constituents of food, their sources, functions, deficiencies and daily requirements in health and illness.

#### **B-Intellectual Skills:**

- **b1**. Construct simple Materials for the purpose of health education.
- **b2**. Differentiate between sanitary methods of waste disposal.

# **1-AIMS OF THE COURSE:**

- 1. Formulation of herbal mixtures
- 2. Quantitative and qualitative evaluation of medicinal plants
- 3. Identification of major constituents

# 2-INTENDED LEARNING OUTCOMES:

## **A-Knowledge and Understanding:**

- a1. Giving the knowledge about formulation of suitable herbal drug
- a2- Recognize different methods used to detect adulterants of natural products
- a3- Identify the types of major active constituents who isolated through chromatography

## **B-Intellectual Skills:**

- **b1.** Plan for solving problems
- **b2** Search for suitable method for herbal drug administration
- **b3** Establish a suitable method for herbal drug analysis

#### **C-Practical Skills:**

Faculty of Medical Sciences

(لَمُمْ*هُوُرِبَّ، (لَمِيَمَتِنَ)* وزارة التعليم العالي والبحث العلمي مجلس الاعتماد وضمان الجودة الجامعة اليمنية كلية العلوم الطبية

**c1-**Carry out simple and adequate method for identification of major herbal drug constituents.

- c2- Find methods for isolation of some herbal a drug constituent
- c3- Detect adulteration of any supplied natural drugs.
- c4- Determine the Pharmacopeial constants of herbal drugs

## **D**-General Skills and Attitudes:

- **d1.** Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

#### **C-COURSE CONTENTS:**

NO	TOPICS	NO OF HOURS	No of Lectures
1	Production of medicinal plants	2	1
2	Evaluation of medicinal crude drugs	2	1
3	Biosynthesis of natural products	2	1
4	Methods of Pharmacognosy used in quality control Droplet Counter Current Chromatography Ash value Moisture content Radioimmunoassy Derivatization in HPLC	4	2
5	<b>Structure elucidation:</b> Physical properties, chromatograpic data (GC, HPLC, Ion exchange), determination of molecular formula, spectroscopic data (UV, IR, mass NMR).	6	3
6	<b>Drugs of biological origin:</b> Traditional medicine and medicinal plants : traditional medicine and methods utilized in traditional medicine, herbal medicine, vertues and shortcomings, the scientific basis of herbal medicine, treatment of constipation, asthma, inflammation and peptic ulcer, therapeutic effects of ginseng.	6	3
7	<b>Tissue culture and molecular biology</b> Basic principles of plant tissue culture, techniques, callus culture, cell culture, organ culture, meristem culture, protoplast culture biotransformation using cell culture, cryopreservation of germplasm, plant cell immobilization	6	3

# **1-AIMS OF THE COURSE:**

- 1. Give knowledge about the diagnosis of disease.
- 2. Analyze the all information about patient's state according the patient history, clinical features and laboratory findings.
- 3. Solve the given case according to the correct therapeutic way.
- 4. Detect the complications of the diseases.
- 5. Recognize the safety of drugs in special groups like children, elderly and pregnancy.

وزارة التعليم العالى والبحث مجلس الاعتماد وضمان الجودة الحامعة اليمن كلية العلوم الطبيا

#### 2-INTENDED LEARNING OUTCOMES: A-Knowledge and Understanding:

**a1.** Define the Epidemiology, Etiology, Risk factors for particular condition under study, recognize the Clinical features, laboratory tests for each case study and the correct diagnosis of diseases..

**a2-** Identify Mechanism of the drugs, reasons of clinical complications and drug interaction. and their uses therapeutically concerning their, safety, optimum use in medication and contraindications

**a3-**Recognition of disease state, pathology and management of symptoms, List the therapeutic approaches, both pharmacological, non-pharmacological in details,

# **B-Intellectual Skills:**

**b1-** list precaution to be taken for each prescribed drugs individually or in combination.

**b2** -Explain how to deal with patient when side effect occurred.

**b3**-The student can diagnose disease according to their manifestations, investigations and physical examinations with Interpret the clinical features.

**b4-**Solve the case studies according to the therapeutic way, &Interpret patient and clinical data, including patient records held within practice settings.

## **C-Practical Skills:**

**c1-**Acquire skills to diagnosed the case studies precisely.

**c2-**Evaluate critically observations and measurements, in terms of their significance and theory underlying them.

c3-Give advises for the patients and others on the safe and effective use of medicines

## **D-General Skills and Attitudes:**

- **d1.** Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

## **1-AIMS OF THE COURSE:**

- 1. Provide the student with roles of community pharmacist
- 2. Learn the student with the methods of patient assessment and care as they relate specifically to the drug and non-drug management of minor ailments.
- **3.** Assess the pathogenesis, clinical features, management and treatment outcomes of some disorders.

# 2-INTENDED LEARNING OUTCOMES:

## A-Knowledge and Understanding:

- a1- Explain the roles of community pharmacist and non-prescription drugs.
- **a2** Understand the method of patient assessment and care.

**a3**- Apply in practice setting the knowledge and understanding required to assess the pathogenesis, clinical features, management and treatment outcomes of some disorders

## **B-Intellectual Skills:**

**b1-** Differentiate the symptoms of different causing diseases.

**b2-** Identify the drug manufacturing relating problems and solve

**b3**-Apply in practice setting the knowledge and understanding required to meet the needs of patient and other health professionals

**b4** Apply in practice setting the knowledge and understanding required to asses the pathogenesis, clinical features, management and treatment outcomes of some disorders

## **C-Practical Skills:**

- c1- Diagnose and treatment of some minor illnesses.
- **c2** Dispense the drug prescription.
- c3- Manage the drug adverse effect or drug interaction

# **D-General Skills and Attitudes:**

- d1. Work separately or in a team to research and prepare a scientific topic.
- **d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

	Credit hours:		Total					
2		Theoretical	Practical	Training	Seminar	Total		
		2	2			3		
3	Study level/ semester at which this course is offered:	Fifth Year / First Semester						
4	Pre –requisite (if any):	Medicinal Chemistry 1 & Pharmacology 3						
5	Co –requisite (if any):							
6	<b>Program</b> (s) in which the course is offered:	Bachelor of Pharmacy						
7	Language of teaching the course:	English						
8	The department in which the course is offered:	Pharmacy						
9	Location of teaching the course:	Faculty of medical scientists – AL-Yemenia University						
10	Prepared by:							
11	Date of approval:							
	B-PROFISIONAL INFORMATION							

# **1-AIMS OF THE COURSE:**

- 1. Provide the knowledge of chemistry of drugs with special references to their pharmaceutical and medicinal usage.
- 2. Acquire the knowledge about the relationship of chemical structure and therapeutic properties.
- 3. Correlate medical chemistry facts with manufacture drugs & clinical application.

# 2-INTENDED LEARNING OUTCOMES:

# A-Knowledge and Understanding:

- **a1.** Understand the principles of medicinal chemistry
- **a2.** Describe the basic principles of mechanism action for active groups in pharmaceutics chemistry.

**a3.** Explain the different reaction between active groups in pharmaceutics chemistry special in preparations of drugs and nomenclature chemically of medical chemistry.

# **B-Intellectual Skills:**

**b1.** Apply preparation (synthesis) of medical compound drugs

**b2.** Identify the different of medical compound drugs by assay& titration

**Faculty of Medical Sciences** 

الجم مورك العني التعميم العلمي وزارة التعليم العالي والبحث العلمي مجلس الاعتماد وضمان الجودة الجامعة اليمنية كلية العلوم الطبية

b3. Determine medically used & roles of important medical compound drugs.

## **C-Practical Skills:**

c1. Maintain the name of chemical compound & derivatives or chemical modification effects.c2. Estimation of drug half life.

c3. Classify of medical compound drugs according to medically used & active group

## **D**-General Skills and Attitudes:

**d1.** Work separately or in a team to research and prepare a scientific topic.

**d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

# **1-AIMS OF THE COURSE:**

- 1. Determine pharmacokinetics (absorption, distribution, metabolism and excretion) and drug benefits (therapeutic actions, indications, efficacy and potency) & Drugs for endocrine glands disorders& drug posology of drugs affecting central nervous systems and analgesic drugs.
- 2. Discuss drug limitations (side effects, contraindications, precautions, use in special patent categories and drug interactions) of Drugs for endocrine glands disorders and drugs affecting central nervous systems and analgesic drugs.
- 3. Comprehend his/her role as a pharmacist in providing correct information on rational use of medications.
- 4. Classify drugs affecting central nervous systems and analgesics into various categories
- 5. Compare between therapeutically related drugs based on drug benefits (in particular efficacy and potency) and drug limitations.
- 6. Relate drug indications to MAO of drugs & Predict drug limitations on the basis of Drug MOA.
- 7. Select an appropriate drug for patients based on drug benefits and limitation

المحكم لي العالي والبحث العلمي وزارة التعليم العالي والبحث العلمي مجلس الاعتماد وضمان الجودة الجامعة اليمنية كلية العلوم الطبية

## 2-INTENDED LEARNING OUTCOMES:

### A-Knowledge and Understanding:

**a1**.Determine pharmacokinetics (absorption, distribution, metabolism and excretion) and drug benefits (therapeutic actions, indications, efficacy and potency) & Drugs for endocrine glands disorders& drug posology of drugs affecting central nervous systems and analgesic drugs.

**a2.** Discuss drug limitations (side effects, contraindications, precautions, use in special patent categories and drug interactions) of Drugs for endocrine glands disorders and drugs affecting central nervous systems and analgesic drugs

**a3**. Comprehend his/her role as a pharmacist in providing correct information on rational use of medications.

#### **B-Intellectual Skills:**

b1. Classify drugs affecting central nervous systems and analgesics into various categoriesb2. Compare between therapeutically related drugs based on drug benefits ( in particular efficacy and potency) and drug limitations

**b3.** Relate drug indications to MAO of drugs

**b4**. Predict drug limitations on the basis of drug MOA, select an appropriate drug for patients based on drug benefits and limitation

#### **C-Practical Skills:**

**C1.** Calculate accurately drug's dosage, bioavailability, plasma half-life and volume of distribution in

different patient populations.

**C2.** Compare between therapeutically related drugs based on drug benefits ( in particular efficacy and potency) and drug limitations.

C3. Carry out appropriate techniques and measurements in experimental pharmacology.

**C4.** Identify the common laboratory animals, laboratory equipment and conduct analytical procedures, appropriate to pharmacology, in a safe, accurate and precise used in

experimental

pharmacology.

#### **D-General Skills and Attitudes:**

**d1.** Work separately or in a team to research and prepare a scientific topic.

**d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

## **1-AIMS OF THE COURSE:**

- 1. Acquire knowledge about the diagnosis of disease.
- 2. Analyze the all information about patient's state according the patient history, clinical features and laboratory findings.
- 3. Solve the given case according to the correct therapeutic way.
- 4. Detect the complications of the diseases.
- 5. Recognize the safety of drugs in special groups like children, elderly and pregnancy..

## 2-INTENDED LEARNING OUTCOMES:

### **A-Knowledge and Understanding:**

**a1.** Define the epidemiology, etiology, Risk factors for particular condition under study, understand the principals of Anatomy, histology, pathology and physiology that relevant to clinical pharmacokinetic of drugs.

**a2-** Recognize the Clinical features & laboratory tests for each case study & the correct diagnosis of diseases..

**a3-** acquire knowledge about drugs, their uses concerning their identities, safety, optimum use, contraindications, recognition of disease state, pathology and management of symptoms.

#### **B-Intellectual Skills:**

**b1-** list precaution to be taken for each prescribed drugs individually or in

وزارة التعليم العالى والبحث مجلس الاعتماد وضمان الجودة الحامعة البمنية كلية العلوم الطبية

#### combination.

**b2** -Explain how to deal with patient when side effect occurred, solve the case studies according to the therapeutic way.

**b3**-The student can diagnose disease according to their manifestations, investigations and physical examinations.

**b4-**Interpret the clinical features and the diseases related to them.

#### **C-Practical Skills:**

c1-Acquire skills to diagnosed the case studies precisely.

**c2-**Evaluate critically observations and measurements, in terms of their significance and theory underlying them.

**c3-**Give advises for the patients and others on the safe and effective use of medicines

## **D**-General Skills and Attitudes:

**d1.** Work separately or in a team to research and prepare a scientific topic.

**d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

# **1-AIMS OF THE COURSE:**

1- Develop an understanding of the complete process of the drug distribution system, from the purchasing and receipt of drugs by the hospital including their administration to the patient. 2- Understand of an intravenous admixture service, including total parenteral nutrition and chemotherapy

3- Provide student with a detailed knowledge and understanding concerning the responsibilities of a hospital pharmacist.

# 2-INTENDED LEARNING OUTCOMES:

## **A-Knowledge and Understanding:**

**a1**-Explain hospital organization/committee functions, interpret and enter patient orders, prepare intravenous admixtures, total parenteral nutrition, chemotherapy and role of drug distribution.

a2-Understand steps involved in drug therapy monitoring demonstrate proper aseptic technique in IV admixture compounding and demonstrate appropriate and accurate use of calculations in all aspects of intravenous admixture preparation
a3-Describe the role of drug distribution as a component of the provision of pharmaceutical care, benefits, limitations of using a profile for pharmacotherapy monitoring, drug distribution and explain the process of adverse drug reaction reporting and analysis

**Faculty of Medical Sciences** 

## **B-Intellectual Skills:**

**b1**- Calculate the medicine doses and dosage regimen.

**b2**-Interpret patient and clinical data, including patients records held within practice settings.

b3-Interpret of prescription and other orders of medicines.

b4-Identify potential drug- related problems that could occur as result of the hospital's distribution system and identify ways to prevent their occurrence.

## **C-Practical Skills:**

c1- Design and evaluate therapeutic regimens to optimize drug use.

c2-Interpret and process of medical orders.

c3-Dispense medicines, advice patients on correct and rational use of medicines and cosmetics.

c4-Interpret patient scientific data to help evaluate and optimizing prescribing in primary care.

## **D-General Skills and Attitudes:**

- **d1.** Work separately or in a team to research and prepare a scientific topic.
- d2. Present clearly and effectively scientific topic in a tutorial, a staff meeting or the vearly scientific day.

# **1-AIMS OF THE COURSE:**

- 1. Outline the design and mechanism of action of the instruments included in the unite operation in pharmaceutical practice.
- 2. Point out the principles of each unites operation in pharmaceutical processes.
- 3. Support the equipment used for each unite operation in relation to its advantages, disadvantages and mechanism of action.
- 4. Define the physical principle of each unite operation in industrial pharmacy.
- 5. Acquire knowledge the concepts of pharmaceutical operations as per cGMP including the industrial plant layout design and packaging technology.
- 6. Rationalize the use of the equipment for a specific application in pharmaceutical industry.
- 7. Predict the relationship between the equipment design and product characteristics. Explain and discuss the use of different equipment to achieve certain operation in pharmaceutical industry.

# **1-AIMS OF THE COURSE:**

- 1. To provide the knowledge of chemistry of drugs with special references to their pharmaceutical and medicinal usage.
- 2. To acquire the knowledge about the relationship of chemical structure and therapeutic properties.
- 3. To correlate medical chemistry facts with manufacture drugs & clinical application.

# 2-INTENDED LEARNING OUTCOMES:

# A-Knowledge and Understanding:

- **a1.** Understand the principles and nomenclature of medicinal chemistry
- **a2.** Describe the basic principles of mechanism action for active groups in pharmaceutics chemistry.
- **a3.** Explain the different reaction between active groups in pharmaceutics preparations.

# **B-Intellectual Skills:**

- **b1.** Apply preparation (synthesis) of medical compound drugs
- **b2.** Identify the different of medical compound drugs by assay& titration
- b3. Determine medically used & roles of important medical compound drugs.

الجم موركي العيمية وزارة التعليم العالي والبحث العلمي مجلس الاعتماد وضمان الجودة الجامعة اليمنية كلية العلوم الطبية

Faculty of Medical Sciences

# **C-Practical Skills:**

**c1.** Maintain the name of chemical compound &derivatives or chemical modification effects.

c2. Estimation of drug half-life.

c3. Classify of medical compound drugs according to medically used & active group

# **D**-General Skills and Attitudes:

**C-COURSE CONTENTS:** 

d1. Work separately or in a team to research and prepare a scientific topic.

**d2.** Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.

# **1-AIMS OF THE COURSE:**

- 1. Provide students with an in-depth understanding in principles of drug delivery systems.
- 2. Acquire knowledge about the concept of cosmetic and dermatologic preparation.
- 3. Describe the Preparations of different types of cosmetic preparations.
- 4. Identify the safety concept of cosmetic preparation.
- 5. Interpret the new trends in cosmetic/dermatologic industry.

المحكمورين العيميين وزارة التعليم العالي والبحث العلمي مجلس الاعتماد وضمان الجودة الجامعة اليمنية كلية العلوم الطبية

## **2-INTENDED LEARNING OUTCOMES:**

## A-Knowledge and Understanding:

- **a1-** Discuss the formulation, manufacture, and evaluation of cosmetics for the different body parts like skin, hair, nail and lips.
- **a2-**Describe the morphology, physiology and structure of skin and hair, the problem associated with disorders, precaution and the suitable cosmeceuticals
- **a3-** Illustrate the formulation, manufacture, and evaluation of drugs obtained from natural and synthetic sources used for face cosmetics; cleansing preparations, aftershave, anti-acne products, and tooth and mouth care preparations.

## **B-Intellectual Skills:**

- **b1** Analyze the need for cosmetics in modern society
- **b2** Describe the different methods, techniques and instruments used in formulation of cosmetics.
- **b3** Discover the rationale behind different cosmetics formulations and their quality control.
- b4. Create the safety issues related to the use of cosmetics

## **C-Practical Skills:**

- **c1**.Apply in practice setting the need and working principle for different cosmetic ingredients required to meet the needs of patient and other health professionals
- **c2**.Demonstrate the excellent accomplishment of extraction, formulation and pharmacological action of different cosmetic ingredients and carry out the quality control test according to

GMP.

c3.Offer advices to patients and community on safe and effective use of cosmetics.

## **D**-General Skills and Attitudes:

d1-Work separately or in a team to research and prepare a scientific topic.

**d2**-Present clearly and effectively scientific topic in a tutorial, a staff meeting or the yearly scientific day.
